CLEANING SOLUTIONS FOR IBC TOTES

How much does an IBC cleaning system cost?

Our complete IBC cleaning kit consists of the following:

- 1 x Pump
- 1 x Cleaning head
- 1 x Control switch
- 1 x IBC lid mounting lance

These kits are available in two different models, and both are very effective and efficient ways of cleaning IBC totes. They are priced as follows:

ADVANCED MODEL

£6,350

Ebara EVMS-K 1-3-5
Variable Speed
Pump

Orbitor Eco Rotary
Jet Cleaner

Standard IBC
Lid & Lance

BASIC MODEL

£3,350

Ebara EVMS-K 1-3-5
Variable Speed
Pump

RSB 25
Spinner Cleaner

Standard IBC
Lid & Lance

01273 400092

info@spray-nozzle.co.uk

www.spray-nozzle.co.uk

If a pump isn't required, these kits can be supplied without the pump and the control switch. This will reduce the cost as per the following:

ADVANCED MODEL

£6,350 ~~£3,529~~

Ebara EVMS-K 1-3-5
Variable Speed
Pump

Orbitor Eco Rotary
Jet Cleaner

Standard IBC
Lid & Lance

BASIC MODEL

£3,350 ~~£421~~

Ebara EVMS-K 1-3-5
Variable Speed
Pump

RSB 25
Spinner Cleaner

Standard IBC
Lid & Lance

The bulk of the difference in cost is made up from the different cleaning heads, which are compared and priced as follows:

RSB 25 Spinner

- Low pressure/low impact
- Slower cleaning time
- Less water efficient
- Struggles with tough residues
- **Cost per head: £200**

Orbitor Eco

- High 5 bar pressure/high impact
- Faster cleaning time
- More water efficient
- Handles tough residues
- **Cost per head: £2,976**

It's often the case that the additional capital expenditure is recouped within a matter of weeks, depending on the frequency of the IBC cleaning and the nature of the residues being cleaned.

All prices are correct at the time of publication.
